

10th International Conference POWER RING 2014

„European energy market: between United Europe and the national autonomy”

Co-organiser of the conference: Ministry of Economy of Poland

Honorary patronage: Minister of Economy, Minister of Infrastructure and Development, Minister of the Treasury and the President of the Energy Regulatory Office.

The global energy market is evolving very rapidly while Europe is adopting ambitious targets in the field of climate protection. According to experts, this may bring about a number of additional challenges.

The world does not want to follow the route indicated by Europe. Greenhouse gas emissions are continuously rising despite the positive example of the EU. At the same time, there are still large differences in terms of degree of prosperity of the individual economies within the European Union itself. How can Poland cope with the challenges that appear in the context of the European energy policy? We hope that our conference will enable us to find proper answers.

This event will be held with the participation of **Dr. Fatih Birol**, Chief Economist of the International Energy Agency, **Dominique Ristori**, Director-General of Directorate-General Energy, European Commission, **Janusz Piechociński**, Deputy Prime Minister and Minister of Economy, **Professor Jerzy Buzek**, Chairman of the Public Board for the Sustainable Development of the Energy Sector, and high-profile international guests, leading representatives of the business sector, public opinion leaders and members of the Polish and European Parliament.

8th of December 2014, 9h00, „Pod Kopułą” conference hall
Ministry of Economy, Warsaw, pl. Trzech Krzyży 3/5

The conference will consist of the following sessions:

- European energy policy and a project of European market
- Polish premiere of the report „world energy outlook 2014” joined with a debate „Nuclear energy in the European energy and climate policy” **Co-organiser of the panel: international Energy Agency**
- Business case: can Europe be competitive on the market without re-industrialisation?
- Innovation as a solution for sustainable development

During above mentioned sessions, the following issues will be raised:

- What should be the formula of the European Energy Union proposed by Donald Tusk?
- How to share the burdens?
- Who should be supported and how?
- What example can the EU give to developing countries?
- What is a just method to measure emission reduction: the percentage method, per capita method and the GDP unit method? – this is the question asked by the poorer to the richer!

Applications for free participation at the conference can be submitted on:
www.proinwestycje.pl/registration forms

Details to be found on www.proinwestycje.pl. In case of any questions concerning the conference please contact Agnieszka Ferreira (Project Manager of Procesy Inwestycyjne) at: komunikacja@proinwestycje.pl, tel.: +48 22 424 82 00.
